PROFILE

In modern fashion technology, the demand for perfection begins right at the birth of the raw material, permeates through every single process, till the highly discerning customer dons the finished garment. It is this demand for perfection that has spurred the growth of an organization and its corporate philosophy.

SARA ELGI is a multi-unit, multi-interest business group with a wide range of industrial activity, an organization that has founded its evolution on value based commercial practice.

Those who can reach the clients with the best quality, competitive price, excellent customer service and prompt delivery can only survive in the market. SUPER SPINNING MILLS LIMITED takes immense pride in perceiving its role as the comprehensive architect of every yarn it produces and cater the need of the client by all means.

SUPER SPINNING MILLS LIMITED was established in 1962 with an initial capacity of 12,000 spindles. Over its four decades of chequered growth, it has enhanced to 1,66,000 spindles spread over 4 operational units. Today, the company has carved a niche for itself on the textile map of the country.

PRODUCTS

We believe that quality products are not only by promises but also by proven results. Development of new textile products is done through innovation by defining production processes of higher quality and achieving it with modern technologies and professionals to the highest level of competence.

We manufacture 100% Combed Cotton Grey Yarn for Knitting and Weaving from NE 20s to NE 120s

- Regular Yarn
- Single & Double (Ring Double / TFO)
- Compact & Elitwist
- Gassed Yarn & Mercerised Yarn
- Open-End Yarn

To meet out the customer requirements we have various options in raw materials:

- Indian Cotton
- Organic Cotton
- BCI Cotton
- GIZA & GIZA Blend
- SUPIMA & PIMA Blend

QUALITY

The company has a long reputation for quality, performance and innovation. Quality of final product is determined with quality of raw material. In SUPER SPINNING MILLS LIMITED, we take meticulous care in the selection of cotton. Our dedicated and committed cotton selectors at different stations who are headed by experienced supervisors, spares no pain in the selection of kapas / raw cotton available in the market. There are quality checks at every stage of production starting from raw cotton to finished product. Identification & traceability of the process is prevailing across the entire process.

Our dedicated and committed staff and workforce follow well- defined manufacturing practices to maintain consistency in quality. Investments in sophisticated instruments from world-renowned manufacturers like Zellweger USTER are an integral part of the plan to implement Total Quality Assurance.

In conformance with industry norms worldwide, the company has established laboratory facilities at each unit, equipped with ultra- modern testing instruments.

- SPINLAB HVI 900
- USTERAFIS
- USTER CLASSIMAT
- USTER TENSOJET / USTER TENSORAPID / PREMIER TENSOMAX 7000
- PREMIERAQUA L&N
- PILOT SPINNING
- KNITTING FACILITIES

CONTAMINATION CONTROL

Elimination of raw material contamination has been identified as the major factor of quality control. This is effectively tackled by adopting a three-pronged approach:

- Close interaction with each supplier to ensure conformance to pre-set standards of consistent, contamination-free cotton.
- Rigorous segregation of raw cotton at the ginning as well as mills to eliminate contaminated material.
- Installation of contamination remover at the Blow room stage and contamination clearer at the yarn stage to ensure purity of processed yarn.

SPINNING

Superior Quality machines installed at SUPER SPINNING MILLS LIMITED include:

- | | |
|---|---|
| RIETER | - TRUTZSCHELER- Cards DK 803 & 903 |
| Vision Shield Foreign Fibre Remover in Blow Room, Unifloc A10 & A11 | - CROSROL Cards MK 5A & 5B |
| Drawframe RSB 851, 951 & D30, D40 | - KIRLOSKAR TOYODA Ringframe |
| Unilap E32, Combers E 7/5 A, E 7/6, E62 | - MURATA21 CAuto Coner with Uster |
| Suessen Elite Compact & Elitwist | - Quantum Foreign Fibre Clearer, |
| | - SCHLAFHORST 338 Auto Coners with Loepe and Uster Quantum Foreign Fibre Clearers |

LAKSHMI RIETER

- | | |

| | - PSM – Soft Package Winding |

SUSTAINABLE COTTON PROGRAMME

Amongst the new generation of textile companies in India, SUPER SPINNING MILLS LIMITED, believes in gaining customer satisfaction and confidence by benchmarking global standards in innovation, technology, quality and consistency. The aim of our sustainable cotton project is to establish a healthy, ecologically and economically sustainable cotton cultivation system and also to maintain a whole supply chain reaching from producer to the consumer.

SUPER SPINNING MILLS LIMITED protects the health of people and the planet by reducing the overall exposure to toxic chemicals from synthetic pesticides that can end up in the ground, air, water and food supply and that are associated with health consequences, from asthma to cancer.

1. ORGANIC COTTON

Aligning with Nature, we follow Organic Pest Management practice where natural means of practices are followed. The criteria we follow include.

- Selection of appropriate variety of the crop for the season.
- Improving soil health against pest and diseases.
- Encouraging natural predators/Biological agents to act against insects and diseases.
- Soil nutrient enhancement by using Vermicompost and leguminous mulching.
- Crop rotation

Organic agriculture & process doesn't use toxic and persistent chemicals. Choosing organic products is an easy way to help and protect the mankind. We are proud and we are part of it.

2. BETTER COTTON INITIATIVE

Vision without a task is only a dream. But vision with a task is a reality. SUPER SPINNING MILLS LIMITED always has broader vision and task for the betterment of the community and growth.

Better Cotton initiative (BCI) project is also one of the important farm based programs operated by the organisation from the year 2010 onwards. BCI mainly concentrates on the social and environmental conditions of the farmers and for better practices to increase the yield, improve the quality and reduce contamination.

QUALITY AND INTEGRITY

The customer oriented production program covers a wide spectrum of activities from field to spinning, which integrates facilities for production and supply of the finest quality of organic cotton yarns. Technologically our spinning units ensure supply of consistent quality yarn to manufacture finest garments.

SUPER SPINNING MILLS LIMITED is equipped with vertically integrated processing facilities from Spinning to meet eco-friendly standards certified by Control Union Certifications on GOTS standards and Organic Exchange Standards.

Our Spinning Unit in Karur consumes 100% renewable energy. We have 7 Windmill spread across two districts (70 Lakh Units Per Annum) and we are having the gas power for the energy. In other words, we are reducing 5500 tons of carbon emission into the atmosphere by way of wind & gas energy, to address the global warming issue.
